

## MARTIN LUTHER KING, JR. DRIVE INNOVATION CORRIDOR PROJECT

### Project Overview

The City of Atlanta was recently awarded a \$10 million TIGER Grant for the Martin Luther King (MLK) Jr. Drive Innovation Corridor Project. MLK Jr. Drive is a heavily used east-west corridor that connects points of interest such as the new Mercedes Benz Stadium, the Atlanta University Center, the Atlanta BeltLine, Westview Cemetery, and several MARTA rail stations. This \$27 million corridor improvement project spans approximately 7.2 miles from Northside Drive to Fulton Industrial Boulevard and includes a combination of federal, state and local funding.

The project will address vehicular and pedestrian safety concerns, provide additional pedestrian and bicycle access through the implementation of new multi-use trails, and introduce a new linear park along the corridor. It will also include raised landscaped medians, pedestrian crossing islands, repaired sidewalks, ADA upgrades, and a new two-way cycle track. There will also be traffic signal improvements, upgraded signs and markings along with lighting improvements along the road. The goal is to transform MLK Jr. Drive to a pedestrian and bicycle friendly corridor with improved access to the Atlanta BeltLine and MARTA bus service.

MLK @ Northside Drive

MLK @ Mosley Park

MLK @ Westview Cemetery
